

Balanced Fairy Chess Armies

Generated by the Piece Value Model

August 27, 2025

1 Introduction

The strength of the classical chess army (2R+2N+2B+Q) is calculated to be 2879.67 centipawns. The following sections list computer-generated, symmetric armies of four distinct pieces whose total strength falls within a tolerance of the classical army. The starting position should have both kings placed in the E-file with 2*8 pawns¹ on the 2nd and 7th ranks. For instance, if we print 2*X — 2*Y — 2*Z — 1*T, then it means that the starting position should be XYZTKZYX.
